

Vehicle Movement Digi Pass

An initiative by Gurugram Traffic Police to digitalize the vehicle permit procedure & facilitate paperless mode of application for commercial vehicles plying in the city during No Entry hours

To facilitate vehicle movement for commercial vehicles during 'No Entry Time' in the city, an online application has been developed where in commercial vehicles can apply for digital permits from Gurugram Traffic Police Department to move within the city during the 'No Entry Timings' of 8-10 am and 5-9 PM on designated areas.

The Application has been developed for vendors, organizations and firms involved in essential services for seeking permits to allow their commercial vehicles to ply within the city during 'No Entry Period'. This is being done to make this procedure more digitalized, paperless and will streamline the process of entry for commercial vehicles in a more organized and seamless manner.

Under this initiative, the vendors can register on the portal <https://onemapdepts.gmda.gov.in/vmp/> and apply online for a Vehicle Movement Pass. The vendor will receive the Digital Movement Pass after it is approved by the Traffic Police Department. A certificate will be generated with QR code to be carried by the vendor on the mobile app which will be scanned by the traffic police team at stipulated checking points to ensure that given permit is taken for the vehicle to ply on the road during the given time period.

Permits for vehicles belonging to organizations or firms related to healthcare, tent, food & Beverage's catering, food supply chains, manufacturing industries, ecommerce and other essential services providers will benefit from this new Application as the permits can be applied online and be received within a short span of time.

The permits will be granted free of cost to these vehicles and will be dependent on the density of traffic and capacity of the road for which the permission is being sought by the applicant. Initially, permits will be given by the Traffic Police Department for three months.
